

Piping Engineer

Company Overview

Eurotecnica Contractors and Engineers is an internationally renowned engineering and contracting company, active in the chemical, petrochemical, refining, and solar fields.

Eurotecnica is part of the **Proman Group** - a corporation with assets in Trinidad & Tobago, USA, Mexico, Germany, Italy, Switzerland, Portugal, and Oman.

The Opportunity

The selected candidate will be responsible for activities related to its discipline within a project.

As part of a group of piping and layout engineers assigned to the project, he/she prepares deliverables and executes activities within the Piping and Layout discipline for a specific project in compliance with safety and technological requirements and standards defined for the project.

He/She reports to the Head of Department, while reports to the Piping Discipline Leader assigned to the project for the project related activities.

Key Responsibilities

Guided by the Piping Discipline Leader, Piping Engineer main tasks during project execution are:

Development of discipline deliverables such as:

- Prepare CAD design drawings for Plot Plan, Equipment Layout, Piping Arrangement Drawing, Piping Isometrics, Piping Supports, Piping Tracing, Structural One-line Drawing, One-Line Platform and Ladder, Above Ground Foundation and Underground Piping, Setting plan for equipment
- Arrange 3D models for Piping, Equipment, Structures, Supports and other plant ancillaries.
- Piping design on Piping and Instrumentation Diagrams (P&IDs) using CAE software Siemens Comos.
- Check and correct Drawings, Sketches, Standards.
- Prepare Piping Line List, Isometric lists document.
- Prepare Bill of materials and material take-offs for Pipe, Fittings, Valves, Piping Supports.
- Review Suppliers/Manufacturers Drawings
- Update AS Built Drawings.

As part of the Department the Piping Engineer:

- Provides feedback to Piping Discipline Leader to increase efficiency of the group assigned to the project
- Receives continuous training on the job according to the needs of the Department acquiring competences and shared experiences
- Keeps himself updated about the instrumentation design
- Pursues the continuous improvement of his proficiency and technical competences

Possible additional tasks:

- He/She can be asked to assist the pre-commissioning/commissioning supervisor and start-up supervisor for all those activities related to plant process automation
- He/She can be asked to participate to manufacturer inspections

Requirements

- High school or bachelor's degree in mechanical engineering or equivalent technical education.
- 2/3 years of work experience are highly appreciated.
- Experience in an engineering company operating on chemical/petrochemical plants may be a plus.
- Willingness to continuously improve own skills and competencies.
- Proactivity, sense of initiative, ability to work independently and in a team.
- Fluent in English (written and spoken).
- Availability to short and long term national and international business trips.

We encourage candidates who may not meet every single requirement to apply, as we provide opportunities for growth and learning.

What we offer

- **Work-life balance:** The company offers the option to work both in the office and from home, thanks to **competitive remote working, flexible working hours and devices.**
- **Investment in personal growth:** Coaching and learning programs are planned, with scheduled sessions between employees and managers to define growth paths. We believe in **training on the job** and **learning by doing** methods. We offer a **permanent contract** and **annual gross salary** commensurate with experience.
- **Employee wellbeing:** Support is offered through health insurance, corporate welfare and wellbeing initiatives. **Corporate welfare:** for example, supplementary health care fund, occupational and non-occupational accident policy. **Great ticket restaurant** and always a **free coffee.**

Selection process

The process includes interviews with the HR team, technical assessments and final in-person meetings.

If all of this sounds good to you, then follow the instructions to apply and start your journey with Eurotecnica. Applications are encouraged even if you do not meet all the requirements, underlining the importance of **passion and commitment**.

Send an email to: jobs@eurotecnica.it with your **cover letter** and **Resume/CV**.
Subject line: **Ref. COD.: PIP**
